

**Dear Customer / Tenant:**

We have been engaged by the Management of the building to carry out a routine pest control service program in the premises occupied by you. This service is being performed to prevent **GRAIN BEETLE** infestations.

The service will be performed on \_\_\_\_\_.

In order to enable our Pest Management Professionals to apply an effective treatment, we require your cooperation in carrying out the following instructions:

1. Remove **all items** from the kitchen cupboards, drawers, refrigerator tops, stovetops and counter tops. Place them on the kitchen table. The table and the items on it should be covered with plastic sheeting or blankets to prevent any possibility of treatment with the insecticide.
2. Birds and pets must be removed from the premises. Fish tanks and pumps must be covered to prevent poisoning. Plants must be removed from windowsills and should be covered.
3. Everyone must leave the premises for at least 4 to 6 from the time we finish the treatment. Anyone who has allergies, asthma, is pregnant; children under the age of 4, or anyone with respiratory problems should leave the premises for 12 to 24 hours.

**ON RETURNING TO YOUR PREMISES, THE FOLLOWING SHOULD BE UNDERTAKEN IMMEDIATELY:**

1. Wash off kitchen counter tops, breadboard, refrigerator and stovetops with soap and water. **DO NOT WASH CUPBOARD SHELVES AND DRAWERS.**
2. Place paper on shelves and in drawers before returning any items. Do not remove paper from shelves or drawers for at least three (3) weeks from the date of treatment.

To prevent grain beetle infestations from occurring, we recommend that all products made from grain, chocolates, candies, nuts and pet foods, be placed in insect proof containers on day of purchase and be rotated as new products are purchased.

Thank you for your cooperation!
