

Dear Customer / Tenant:

In order for Poulin's Pest Control to be successful in controlling pests in your yard and around your home, please perform the following preparations prior to and after our treatment:

Before Treatment:

- Please make sure that all toys, BBQs, lawn furniture, or any materials that can be moved are placed away from the areas where treatment will take place.
- Ensure all windows are closed and air conditioning units are turned off.
- Please make sure that you cut your grass and clear any animal waste before we perform the treatment of the yard.
- If you are having any contract work on the exterior or interior of the house where the contractors would be present during the pesticide application, please make sure they are aware and not present at the time of application.
- Everyone, including pets, must remain indoors during the pesticide application and keep off of the treatment areas for a minimum of 4 hours and/or until the pesticide has completely dried. Anyone who has allergies, asthma, is pregnant, children under the age of 4, or anyone with respiratory issues, are recommended to leave the premises or stay inside the residence for additional time until the pesticide treatment residual and/or smell has subsided.
- Notify you neighbours that a pesticide application will be occurring on a specific date and time so they can make sure their windows are closed and any air condition units can be turned off during the pesticide application.
- If your neighbours have pets please have them kept inside during the pesticide application.
- If neighbours do not cooperate, treatment may not be performed and a service call will be charged.

After Treatment:

- **DO NOT** walk on or enter the treated area(s) for at least 4 hours.
- **DO NOT** allow pets and other animals to enter the treated area(s) for at least 4 hours.
- Wash down any play structures or immovable objects in the yard if children or other people/pets are going to use the structures or equipment after the 4-hour time period has passed.
- Please try to minimize any additional water being added to the treated area(s) so the residual effects of the pesticide application continue to work on the yard pests.

Please Note: A Pesticide Application sign must remain in your yard for 24 hours after treatment. Please do not remove this sign until 24 hours has passed.

Thank you for your cooperation!
